

**INSTRUCTION SHEET**  
for  
**Service Adaptive Defrost Controls**  
**(4388931R, 4388932R, 2304099R)**

Included with this service adaptive defrost control is a wiring harness. If the model being repaired used production part number 2154674 or 2154985 (refer to the old component or repair parts list) this harness **MUST** be used for these applications. If the production part being replaced was not one of the production numbers mentioned before, **DISCARD** the wiring harness.

	<b>! WARNING</b>
	<b>Electrical Shock Hazard</b> Disconnect power before servicing. Replace all panels before operating. Failure to do so can result in death or electrical shock.

Follow these instructions for installation of the wiring harness if required:

1. Unplug the refrigerator or disconnect the power.
2. Attach the square connector on the harness to the White and Brown tabs on the adaptive defrost control supplied.
3. Install the adaptive defrost control onto the control box as normal.
4. Connect the rectangle end of the supplied harness to the two pin connector of the control box harness.
5. Plug in refrigerator or reconnect power.
