

**Warning – Shock Hazard. Disconnect power before repair.
This repair should be made by a qualified Service
Technician.**

This kit contains a new style one-piece drain solenoid and replaces the older two piece versions. (Fig 1)

Note - On models with Electronic Drain Feedback Switch (EESF) the included adapter bracket must be installed. Install the extra mounting bracket with self tapping screws as shown on Fig 2. Attached the EESF to the adapter bracket using original screws.

Do not use this bracket on all other models.
